### \$65,000 FIRE AT BELLEVUE MONDAY

Bellevue suffered another heavy loss early Monday morning when the building known as the Farmer-Wheeler block was completely destroyed. It was occupied by K. A. Saad, dry goods store, Evans' bakery and Martell's barber shop and none of the stock of the above businesses was saved. The origin of the fire is a mystery, it being discovered about three o'clock in the morning. It is estimated that Mr. Saad lost in the neighborhood of thirty-eight thousand dollars in his stock and Evans had just received a thousand dollar order of flour a few days before and it was also burned. The water pressure was very low and had no effect whatever on the blaze. The whole loss in stock and store is estimated to be around \$65,000.

Johnson and Cousins opened up in their new store building this week and after viewing it and the new stock they have laid in, we are not afraid to state that they now have one of the nicest stores in these parts. Naturally being new, everything appears clean and orderly and we trust that they will endeavor to keep it so. They are to be congratulated on the stand they have taken considering the loss they suffered in the fire last winter.

Work is progressing rapidly on the new theatre and it will likely be ready for the public in the near future. It is located in the same place as the one destroyed and is a great improvement over the old one.

Dr. and Mrs. Olivier and family, and Mr. G. N. Elwin and son Billy, are leaving tomorrow by motor for Nelson and other points west.

### LOCAL WHOLESALE BUSINESS CHANGES

Mease, H. J. Scott and A. F. Farley, both of Calgary, and well known throughout the Park District, have entered into the wholesale business here with Mark Sartoris, under the name of The Blairmore Wholesale Company. They will handle the same lines that Mr. Sartoris had before, and have added a line of high-class fancy biscuits manufactured by Farley & Myers, the former being a brother of Mr. Farley here. They are also putting in a full line of grocery specialties.

We predict a brilliant future for the business under the management of these three gentlemen as Mr. Scott just severed his connection with the Hudson Bay wholesale department after seven years of service; Mr. Farley has been engaged in the grocery brokering business for himself in Calgary, and Mr. Sartoris has conducted a wholesale business here for several years. All three are keen, live business men and are well known throughout The Pass.

The business opened under the new name the first of this week and they have been busy lining it up to give a first class and efficient service as well as the best lines of goods at the best prices they can secure for their customers.

### LOCAL MINE RESCUE TEAM TAKES THIRD

The Mine Rescue and First Aid Contests held at Banff last Friday and Saturday were keenly contested and were witnessed by large numbers of people from all over the province.

The Blairmore second team under Captain Dave Martin and composed of himself, C. Thompson, W. Turner, F. Allott, A. McKey and Carl Smith, won third place among the twelve teams competing. The two East Kootenay teams were first and second so the local team headed the list of Alberta contestants and are to be highly commended on their successful efforts. The No. 1 team from Blairmore, captained by A. Hamilton, came tenth in place.

The Belgrave team under J. McIntyre won fourth place and the other Bellevue team under Capt. T. Bradley was eighth.

(Continued on Page 7)

### ALBERTA COAL WILL BE MADE TO CONFORM TO STANDARDS

EDMONTON, July 5th.—That coal products of Alberta mines be stabilized as to size and that coal of certain sizes be described by certain names, such as lump coal, stove coal, egg coal, etc., was the aim of a resolution passed at an all-day session of Alberta coal operators and government officials at the provincial buildings today. A committee of nine in all is to be selected from the different fields, two each from Edmonton, Lethbridge and Drumbellier and three from the smaller fields and this committee will bring in recommendations to the operators regarding grading as to sizes. The operators will meet again to consider these and other recommendations at the call of the premier. Included in the large number of operators at the meeting were:

Louis Stockett, Lethbridge; Jesse G. Gouge, Drumheller; R. N. Young, secretary of the Western Canada Coal Operators' Association; Gordon Dickson, Brule; C. G. Sheldon, Edmonton; J. Parker, Coalspur; L. Tupper, Wayne; Mr. Morrow, Canmore; Messrs. Fraser and Mackay, Edmonton; George Montgomery, Edmonton; E. A. McBain, Edmonton; G. Brookbank, Calgary; J. Reed and R. L. Brown, Edmonton; T. Henderson, Tofield; W. S. Coupland, Edmonton, and many others.

The conference was held in private.

### WASTED DOLLARS

How often have you returned home on a Saturday night, after having spent \$5 or \$10 without any particular pleasure or profit? Wouldn't it have been better for your future—if instead of spending the money, you had deposited it to the credit of your savings account?

Think it over! Open a savings account next pay day at our nearest branch, and save all your spare dollars.

*Dear Sirs: We thank you for your kind offer. We will do our best to encourage our customers to open savings accounts.*

Blairmore

The recent rains that have fallen on the prairie have put the crops way ahead and farmers all seem to feel that they are at last to be rewarded with a crop that will set them on their feet again.

The conference was held in private.

Despite the fact that Bellevue has suffered two heavy fires this year, the building trade is booming along in great style. New buildings and residences are springing up all over the village and everything looks very promising.

**Be Vigilant**

Born vigilance is the price of liberty. This is a maxim true in all walks of life, but it is especially true in the lives of Western Canadian farmers during these admittedly trying years. Farmers with years of experience in those Prairie Provinces have come to understand conditions and well know what should be done, and can be done, better than anyone else, but the fact must be recognized that here in the West hundreds, yes thousands, of men are engaged in the work of agriculture who are more or less new to the country and have not yet gained that experience of conditions here which will enable them to combat adverse conditions with the largest possible measure of success. It may, therefore, not be out of place, and indeed of some value, to emphasize one or two factors which are essential to success in this country.

At the time of writing agricultural conditions in Western Canada are distinctly favorable; more favorable in fact than they have been for some years. According to mid-June reports from all parts of the West the growing crop is most promising. Alberta has more moisture than in any year for five or six years past, and both Saskatchewan and Alberta have been visited with unusual rains over large areas, with the result that the grain is making a rapid growth, and the farmer, so far as he is able, is in no position in many ways to be affected by losses in other grain.

But, let it be noted, external vigilance is the price of liberty, and liberty for the Western farmer at the present time means security from the many dangers which threaten the growing crops. Some things cannot be overlooked, for example. One where it is impossible for him to adopt preventive measures, he can provide some measure of security through insurance. The wise man will make such provision. If his crop suffers, he can well afford to pay the premium; if he suffers full losses, he is in the money and all is lost.

In recent years the West has suffered enormously from the grasshopper pest. Experience has now shown how to successfully combat this scourge and preparations for so doing have been made by Governments and municipalities on a large scale. It remains for the farmers, individually and collectively, to utilize their stores and through the most effective co-operation with official agencies fight this scourge to a finish. As the motto of the Rotary Club says, "It can be done." It remains for the farmers during a comparatively short period to put up a fight. It is a fight which, if waged successfully this year, will likewise bring results in improved conditions in the years to come.

Then there is the world pest. It too, must be fought. Unless it is, it will bring disaster to us all, and, unfortunately, it is already the stealthy, hasty, indifferent invader who suffers from it. It is the infestation of the world and the community as a whole. In districts where the hide, wet spring, moist cropping of the land impossible, farmers should this year wage unrelenting war on weeds, and the neglectful farmer in this respect should be brought to book by usurpative authorities. If the individual farmer who allows his land to run to weeds suffers alone, it would be serious enough; but when through his idleness and neglect whole districts are threatened he should and must be made to act in the public interest if he will not in his own.

As the season advances and the grains and grasses ripen and dry, all possible safeguards against fire should be provided. Last year property loss in Canada from fire totalled over \$45,000,000, or more than \$5.00 for every man, woman and child in Canada, not to speak of the even more serious loss of life and others injured and forced to flee. Fire in these Prairie Provinces is a serious thing because such a large proportion of the population live in rural parts where it is well nigh impossible to provide efficient fire-fighting equipment. Prevention is better than cure, especially in the case of fire where so frequently there can be no cure. At harvest and threshing time especially, let it be repeated, that in the name of freedom from fire, eternal vigilance is the price of liberty.

Parliament and Legislatures, spurred on by the senior representatives and the public, are solving the grasshopper problem, seeking to devise ways and means whereby the farmer will receive an adequate measure reward for his toil and hardship, but their best efforts will not suffice until an substantia! result is to be achieved by many individual farmers for themselves through the taking of absolutely necessary precautions and thereby preventing losses again, which legislation will not protect them.

Constant vigilance and the taking of simple, commonsense precautions for a few short summer and early Fall months may easily result in larger gains than all the legislation in the world can provide, and without which all legislation is徒劳.

**Modern Study of Geography****Countries Are Real Places to Children of Today**

It is severely needed to expose the power of the news of the day in taking the reader to strange places and strange scenes. In later years it has been made quite plain to me and indeed a short mind is required to keep up with the rapid evolution of political geography. Many things have occurred to prove that geography is a necessary part of the equipment of citizenship. That the deportation of the Boer War prisoners concerned our affairs we could hardly imagine; but who had any notion of the significance of the Prince of Wales or the Island of Manx in the modern world? The children of today are very fortunate. Geography study is concerned with realities. Children think while still in their kindergarten are

making relief maps of their native districts. The foreign countries of which they hear are not merely "name places," but real places with real people sending real coins and telling real things in return. Geography is a science nowadays, and teachers of today have brought this science out of the clouds of abstraction to living facts.—Montreal Gazette.

For Canada—in line of the chief recommendations of the Trans-Pacific Oil that it be used immediately with as much success as it can possibly achieve. Sufferers from asthma and catarrh. My nose and throat often stopped up, and I had disagreeable attacks of coughing, came on. It seemed as if I would hardly live through it. I would gap for breath. Continuous treatment was a continual torture, nothing would give me relief. Many sufferers from this ailment have found relief in the oil and have sent testimonials.

Be fair to your local pharmacist. Go to see his quid and compare prices before sending your money to the mail-order houses. You will find white still in their kindergarten are

thinking that it goes.

**Co-operation Under For Nation's League****Executive of Society Aids All of All Organizations**

The influence and co-operation of all Canadian organizations such as labor organizations and women's societies in the work of the League of Nations in Canada is urged in a statement by the executive of the society.

"The executive of the League of Nations Society, says, the organization wishes to express its earnest hope that each organization will associate themselves as corporate members and in all the great work of promoting peace and the elevation of spiritual aspiration in demonstration of the world to that end. On such united and earnest efforts any certain hope of permanent and long-continued peace can alone be based."

A recent change in the constitution in the League of Nations Society permits any organization or association established for public objects to become a corporate member of the League of Nations Society.

**Up to Date**  
—Do you buy in large from college? Do you take any interest in your farm?

Smith—He's beginning to show me where we must have a new golf course and how simple it would be to turn the farm into a range.

Sell me on my golf course to students. Help me to earn money and will show you my golf course.

Having the medical history cards discovered by the Royal Society of Medicine was a blessing here.

Worried about the new country where

**WARNING!** Say "Bayer" when you buy Aspirin.

Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and does work well by physicians during 22 years and proved safe by millions for.

Colic	Headache	Rheumatism
Toothache	Nervousness	Neuritis
Epilepsy	Lumbar	Pain, Pain

Each "Bayer" box of 32 tablets—the bottle of 30 and 100—disguise in the box, respectively, in shades of blue, blue-green, and green, and are stamped with the words "BAYER TABLETS OF ASPIRIN" and "MADE IN U.S.A." and "U.S.P." and "U.S.P. 1918."

**HEART WOULD BEAT LIKE A TRIP HAMMER**

Black trouble has of late years been catching you in the region of the heart, now and then your heart skips beats, palpitation, throbs, or beats with undue strength and violence you think it is going to burst.

You have weak and dizzy spells, shaking sensations, are nervous, lethargic and depressed, and if you attempt to move you feel as though you got all out of breath.

We know of no remedy that will do much to make the heart regular and strong, regulate its beat and prevent you from getting into such a bad condition.

MILBURN'S  
HEART AND NERVE PILLS

Miss Charlotte, Dahl, Ont., writes:

"I had palpitation of the heart, and the heart exercise, such as going upstairs, took a toll of me, and at times I was dizzy-headed and at times I was drowsy-headed and had a shaking tremor. As a result I took Milburn's Heart and Nerve Pills. After three boxes, and by the time the first was used I began to improve. In all I took six boxes, and now although I may not feel like a kid, I am not dimmed in my judgment, and can walk miles without fatigue. At time of sickness I weighed 120 lbs. now I weigh 125 lbs."

Price 50c. Box at all dealers, or mailed direct on receipt of price to The T. Milburn Co., Limited, Toronto, Ont.

**A Terrible Sea-Change**

Neighbors of United States Have New Something to Think About  
Mr. Wilson's admiring among the youth of hyperboles must look upon us as his to them forever.

Brody had his hands from the British ship that carried him to perdition. Alton, that he was taking luncheon with David Lloyd George, and on Monday in Paris he made that astounding statement:

"The English seem to have forgotten their war antagonists more than any other country and to have set to work more seriously to bring about Europe's reconstruction." With them, apparently when war ends business begins, and they are right."

The admission that the English are right about anything is evidence that Mr. Wilson has suffered a terrible blow. Lloyd George may have never had a more potent headache. The hyperboles confront the amazing declaration of their former spokesman, greatest singing the praises of England in a speech calculated to kill his digest with frenzy.—New York Tribune.

The majority of centenarians have been poor people who have lived a simple life.

The loss of an eye, it is stated, deprives the individual of one-sixth of the field of vision.

**WOULD NOT BE WITHOUT BABY'S OWN TABLETS**

Once a mother has used Baby's Own Tablets for her little ones she would not be without them. They are the ideal home remedy for the infant, and are guaranteed to be absolutely free from opium or other harmful drugs. They are a gentle but thorough laxative and have been proved of the greatest aid in cases of constipation, colic, grippe, colds and simple fevers. Concerning them Mrs. Ernest Gagné, Beaconsfield, Quebec, writes: "I have used Baby's Own Tablets for my baby and have found them so beneficial that I would not be without them. I would strongly recommend every mother to keep a box in her house. The Tablets are sold by many dealers, and by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont."

**Packed Tight—Kept Right**

The Little Shrine of Montreal can not be any stretch of imagination be considered a busy place. The rail way upholds the reputation of the village.

A visitor of Montreal realized this evening after waiting four hours for a sleeping train, he approached the porter:

"Isn't the train coming soon?" he inquired miffly. Just at that moment a dog came trotting up the line and a glad smile illuminated the porter's face.

"Oh, yes, sir," replied the official. "We'll be getting here now. Here comes the engine driver's dog."

The wages on which Columbus discovered America cost about \$7,000 in terms of our present currency.

There are 462 languages and dialects in use among the natives of Africa.

**A WOMAN'S WORK IS NEVER DONE**

It Seems So in Many Cases and Good Health is Always Necessary

Woman's Satisfaction—"I took Lydia E. Phillips' Mecca Ointment for wrinkles of the female organs. It had been in the back and between the legs in the above condition. I could not sleep, sit or walk and was quite ugly to the eyes. I am now well again. I thank you very much. Your Mecca Ointment is the only severe symptom vanishes. It is better now in every way. I am not embarrassed in any way. I am not afraid to go to church, to my friends and to children, nor my parents. I also recommend it to all women who have been married, as my wife told me she has taken it and is quite her own again."—Mrs. Fannie White, Worcester, Mass.

Organic iron, as plentiful in raisins, makes red blood. The blood assimilated in reality and made of the digestives are taken care of. For building up endurance and energy there is probably no food combining this function with such a delicious flavor as raisins.

Many plain foods that you serve regularly can be made more attractive to every member of your household, and more beneficial in a health way, by adding raisins. This is especially true in warm weather, when the excessive heat saps so much of your energy. A good start is raisins breakfast—buy a loaf from your baker tonight and serve it regularly. Its popularity in your home and its ability to replenish tired people to make the end of a warm day will surprise you.

# Western Questions Given Unusual Prominence In Session Just Closed

Ottawa.—The first session of the Fourteenth Parliament of Canada, which closed early June 28, was marked by the appearance of the Progressives as an influential party and the emergence of a fourth or Labor party. The Progressives exerted a dominating influence in many situations during the session, while the two Labor members were active in setting forth their point of view on most of the issues that arose. The fact that the Progressives are predominantly western in membership, coupled with other circumstances in the national situation, combined to give western questions unusual prominence.

The demand for the Wheat Board was the first big western issue to make itself felt and while the western members did not all then asked for they did get a chance to try out their remedy within the limits of the constitution. The railway rate question, wrapped up as it was with the Crows Nest Pass agreement, gave the session a critical windup, and on this issue there was a compromise which gave the west, low rates with the basic industry while referring other rate reductions to the Railway Commission.

Owing to the rush of legislation through the Commons and the Senate, the latter member to complete its labors, it asserted its right to criticize by killing a bill to withdraw Federal control from the Lakes of the Woods, while in the case of the Canada Temperance Act, the Commons had to surrender the section which gave British Columbia authority to prevent the private importation of liquor. The Senate also exercised its customary moderating influence on the Commons' amendments to the Criminal Code, accepting some and rejecting others more radical.

**Britain Signs Agreement With Basra**  
London.—A despatch from Basra, Asiatic Turkey, says King Faisal of the Irak region, his ministers and Sir Percy Cox, High Commissioner for Mesopotamia, have reached a complete agreement on the peace treaty defining the relations between Irak and Great Britain as the mandatory power.

**Allow Children Entry**  
Vancouver.—The Boston family of seven orphan children from Edmonton, comprising two girls and five boys, who were refused entry to the United States about a fortnight ago, were admitted and are on their way south in the custody of an aunt from California.

## Still Hope to Conquer Everest

LONDON.—Pending receipt of a definite announcement from Brig.-Gen. Charles Bruce that the attempt to reach the summit of Mount Everest had been abandoned, there seems to be some uncertainty about it, notwithstanding the recent reports from Calcutta. The Daily Telegraph's Calcutta correspondent attributes to the four members of the British expedition who have arrived at Darjeeling, British India, the statement that when they left the camp their leader and the remainder of the expedition still cherished hope that a last desperate effort might possibly be successful.

## Monarchist Members Assassinated Rathenau

### Several Persons Arrested Charged With Complicity in Murder

Berlin.—The police officially announced that the murderers of Dr. Walter Rathenau, Foreign Minister, were Ernest Werner Tschow, of Berlin, Fischer, alias Vogel, a Saxon, and Knauer, alias Koener, of Korn, of Berlin. All the names are said to be members of the monarchist organization and former members of the brigades of Captain Ehrlhard, who last year planned the overthrow of the Ebert Government and whose name was mentioned in connection with the assassination of Matthias Erzberger.

The police also announced that several persons have been arrested charged with complicity in the assassination of Dr. Rathenau.

### Striking Miners Arrested

Elliott W. Va.—One hundred and five striking miners and their sympathizers were arrested at Thomas, W. Va., when they tried to prevent working men from entering the mine. Sheriff J. B. Oliver and ten deputies made the arrests and took the prisoners on a special train to Parsons, W. Va., where they will be given a hearing later.

### Consider Mailmen's Appeal

Ottawa.—Consideration of the appeal on behalf of rural mail contractors and contractors operating between post offices and railway stations, was promised to a delegation which met Hon. Charles Murphy, Postmaster-General.

While the crowds were dispersing they found fully armed police standing at strategic points under orders to shoot anyone who loitered. Disturbances followed and at one point when the demonstrators refused to move, the police fired.

Official announcement has been made that Chancellor Wirth temporarily had taken over the portfolio of foreign minister, made vacant through the assassination of Dr. Rathenau.

While the crowds were dispersing they found fully armed police standing at strategic points under orders to shoot anyone who loitered. Disturbances followed and at one point when the demonstrators refused to move, the police fired.

## Germans Could Build Long-Planned Tunnel

Minister of Public Works Submits Plan to French Government.

Paris.—A huge war reparations plan under which the Germans who reconstruct France and also build the long-planned tunnel under the English Channel has been submitted by the Minister of Public Works, M. Le Trocquer, to Premier Poincaré, who has laid it before the French members of the reparations commission. The plan involves the use of German labor and materials to the extent of 20,000,000 francs.

The newspapers publishing the details fully approve the project, declaring that under Germany cannot refuse to pay. They assert that if she is able to carry on the construction of railways and telegraph lines in Germany she is able to reconstruct the wounded areas in France and also help build dams, electric power plants and railways, which are needed in France and which are now under partial construction.

## Canada Should Advertise

Member of British Parliament Says We Should Tell the World What We Produce.

Toronto.—Canada needs world-wide publicity, declared Sir Charles F. Hignett, member of the British Parliament for South Wellington, in an interview here. As an Englishman who is supposed to know what is going on in the world, he said he did not know very much about Canada because "it did not advertise very much."

"I do not know the type of manufacturer makes what we produce," Mr. Hignett said. "What Canada is famous for is her fine soldiers—admitted as such by everybody who came into contact with them during the war, and the envy of all nations. They gave the world a great advertisement of Canadian manhood; now in peace times the same must be done for Canadian products in the world's markets."

## Many Were Wounded In Hamburg Rioting

Disturbance Caused by Demonstration Over Rathenau Assassination.

Berlin.—One man is reported to have been killed and ten others wounded in disturbances which followed a big demonstration in Hamburg over the assassination of Foreign Minister Rathenau.

While the crowds were dispersing they found fully armed police standing at strategic points under orders to shoot anyone who loitered. Disturbances followed and at one point when the demonstrators refused to move, the police fired.

## Churchill Says Britain Not Responsible For The Disorder In Dublin

### Antigone Ghost Girl Plans Stage Career

Wants to Earn Money to Build New House

Pictou, N.S.—Mary Ellen MacDonald, Caledonia Mills, Antigonish County, known in connection with a series of mysterious fires and other events which last winter drove her and her grandparents from the home and brought an investigation by Dr. Franklyn Prince, New York, arrived here to commence a proposed stage career.

Mary Ellen, when interviewed, said she wished to make enough money to build a new house. She did not want people to think she caused the mysterious fires.

"The fires were caused by spirit of another world," the girl said. Mary Ellen will be sixteen in August.

### Dawson Being Deserted

People Flocking to New Mining Camp at Mayo

Vancouver.—Dawson City is best known as a deserted town. Hotels and houses are being pulled down and taken to the new mining camp at Mayo, where they are being re-erected. Old-timers of the north predicted that Mayo will be a camp of 20,000 persons in the next two years. Everybody is going to Mayo. This is the word that Thomas Greenway, well known Yukon and former Mounted Policeman, has attempted to gain a living from Northern Alberta.

Mah Loo is the pioneer Celestial of the north country, and though others of his nationality have strayed towards the Arctic Sea on the British Columbia and Yukon side of the border, so far no Chinaman has attempted to gain a living from Northern Alberta.

Recent arrivals from the north say that the Chinese interests are not yet blocked out enough or late for the next 15 years and are carrying out their work at a rapid pace.

**Self Paper Output in U.S.**

Stockholm.—The entire Swedish, Finnish and Norwegian paper output, the newspapers announce, will be sold to America. Most of the big paper mills have signed an agreement to export through a projected American syndicate, headed by one of the officials of the Canadian Export Company.

**Excellent Outlook for Quebec Crop**

Quebec.—The outlook for Quebec's crops upon which hopes are based for the re-establishment of pre-war prosperity is excellent, according to a report by La Banque Nationale. Hay is abundant everywhere and of good quality. Excessive rains have not done any damage to grain.

It pays to patronize home industry, buy from the merchants in your own town.

**No General Election Before Next Session Announced By Premier**

Ottawa.—Sir Louis Davies, Deputy Governor-General, in formally proroguing the session of Parliament, reviewed legislation passed during the session which has closed.

"The act based on the report of the special committee on transportation costs would 'effectively' subdue substantial reductions of freight rates," he said, "which would fail to be of far-reaching benefit to all parts of the Dominion." It was declared.

Measures adopted for the returned men would do much to ensure fulfillment of the patriotic purposes they were intended to serve. By amendment to the election laws, full freedom of the franchise had been secured for additional thousands of Canadian women.

The speech from the Throne, following a review of sessional work, stated that a conference between Federal and Provincial authorities on unemployment was being arranged.

I. T. Shaw (Progressive), West Calgary, asked whether the premier could give an assurance that redistribution would proceed the next general election.

"I think I can assure the Honorable Gentleman," replied Hon. Mackenzie King, "that there will be no election before the next session of parliament, and as soon as the next session convenes it is the intention of the government to introduce a redistribution measure."

"Because," answered Mr. Melgyn, "he has now taken up the position that I have always occupied, and this is one of the great reforms that was promised which has turned out not to be a reform at all but merely a promise."

"I may remark," returned the premier, "that the leader of the opposition has accepted it with his usual grace."

"Because," answered Mr. Melgyn, "he has now taken up the position that I have always occupied, and this is one of the great reforms that was promised which has turned out not to be a reform at all but merely a promise."

### MORE TRUTH THAN POETRY

Are girls as bad as they are painted? a magazine asks. Those who are painted probably are.

A man knows just about what to expect of his boy by reminiscing on his own devilry when a kid.

It costs money to get married; it costs money to be married; and it costs more usually to get unmarried.

A St. Louis woman says she shot her husband "just for fun." She made a hit with her humor, alright.

The wolf doesn't waste much time around the house of a man who is away from home holding down a job.

When a bad egg is kept in hot water by the authorities, it is natural that he should become hard-boiled.

A woman to make a hit on the stage has got to wear the clothes of a princess—or none at all worth mentioning.

The crooks and grafters find some way to circumvent every crook-proof and graft-proof law put on the statute books.

A St. Louis woman says she has been kissed by 10,000 men. Now we know the significance of the term "slapped over."

Life insurance companies wouldn't do much business if they rated their risks by the same method as fire insurance companies.

A mother who has never been a boy can not understand why all the devilry in the family seems to break out in an only son.

An Oklahoman man has secured an injunction to keep his wife from beating him. In this one instance, at least, he beat her.

A London medical journal says that it has been proven that those who talk the most live the longest—and yet women seldom get over 25.

It's not always what others know about us that bothers us so much as having to keep secret so many things we know about ourselves.

A well-known millionaire says the wealth of the world is not equally distributed. Count us one ready to assist in rectifying it.

If the fellow who gets up at 3 a.m. and shivers around in the cold water to catch a few fish, would show the same perseverance in business and as cheerfully adjust himself to the same inconvenience in every-day life, there would not be so many business failures in this old world.

### C. P. R. PICNIC

About three hundred members of the C. P. R. Athletic Club spent the 1st of July in town and the day was very enjoyable to all of them. Several came up on the morning train, and the local had on three extra cars and they were all crowded. They paraded through the town headed by the Kilties Band, after which they went over to the sports grounds and spent the balance of the day playing baseball, football, and other games, in the evening a well attended dance was held in the opera house, the C. P. R. orchestra supplying the music.

## URGES NECESSITY OF RIGID ECONOMY

Home Bank President Discusses Situation—Attend to "Minor Profits."

(Toronto Globe, Wednesday, June 28)

Shareholders of the Home Bank of Canada, met in Toronto yesterday, and received and approved the annual statement, which was reviewed in these columns yesterday morning. Addressed dealing both with the position of the bank and with the general business outside Canada were delivered by President H. J. Daly and General Manager J. Cooper Mason. Perhaps of outstanding interest was the reference by the General Manager to the increased taxes on circulation and the stamp tax to be applied by the Dominion Government. This burden imposed was distributed among all banks, and each would have to bear a share according to its business during the year. As a result of its very widespread application, with its reaction throughout the entire sphere of business, the banks, he said, would be under the necessity of paying more attention to what are termed "minor profits" in order to equalize this new overhead expense. There were many small services that banks customarily performed for the public without charge, but at a small incidental loss upon each transaction. While Mr. Mason did not enter into details on the plan proposed to offset the loss, it is understood that the public will pay for this service, and it is presumed that this was a decision reached at a recent meeting of the Canadian Bankers' Association held in Montreal.

**Crop Outlook.**

Mr. Daly reviewed the crop outlook and was optimistic in his judgment of the situation. With an average towards the realization of the harvest for 1922, he said, it was possible to look hopefully toward the passing of the depression which marked the close of the year 1921. The reports covering the growing conditions of the crops, he added, were highly satisfactory, and the present condition of growth compared very favorably with the standing crop of 1915 for the same period of that year. He sounded a note of warning, however, against the development of an excess of optimism and the undertaking of heavy commitments on prospect alone.

He said, "Even though the crop should be a record one, there is still the same necessity for rigid economy to be exercised in the matter of unproductive expenditure."

Our greatest need in Canada is for a stimulative immigration of agricultural workers, the erection of comfortable dwellings for urban workers, the increase and extension of manufacturing into the lines of many articles we now unnecessarily import, and a systematic co-operation between the Government and the manufacturers to create a demand for Canadian products."

### DRAW ON SAVINGS.

In explaining the small decrease in deposits shown in the statement, General Manager Mason stated that the savings of the community should be drawn upon to meet living expenses in agricultural sections where the crop was disappointing, and in industrial centres where factories that were the support of a large portion of the population had been closed or working part time only. The motive of thrift, on the other hand, he said, had prompted the opening of many new savings accounts by persons who had been less cautious with their money when the volume in general circulation was larger. This increase in the number of accounts, however, was offset by the smaller balances maintained in the average account as compared with deposits of two years ago.

### PROTECTIVE TARIFF A Handicap.

"While business conditions are undoubtedly improving in the West," he concluded, "the application of the high protective tariffs on exports to the United States has so far had an adverse effect. This enactment has been in operation for a year, and has materially checked the exports of the

Prarie Provinces into the United States, the export of cattle suffering the most serious curtailment."

Reference was made to the appointment of J. F. M. Stewart to the Board of Directors several days ago.

There's a right way to do everything, but those who hesitate to do things for fear they are not doing them the right way aren't going to get very far.

## CHIROPRACTIC

(Pronounced Ki-ro-prak-tik)

Treats of the body as a kind of electric power plant with wires conducting the power from the dynamo to the machines. In the human body the brain is the dynamo and the nerve lines conduct the power. The backbone carries the main power line, and branching from this thru the openings between the joints of the spine are the smaller nerves that carry to every organ and cell of the body.

The human spine is made of twenty-four bones making up the spinal column are movable. These moves are normal but there are times when owing to shocks, severe illness, strains and falls they do not return to their proper relationship and spinal deviations result, some of which are serious enough to cause disease and some slight ones causing only some form of organic weakness.

The Chiropractor uses no tools nor instruments other than hands with which he re-adjusts these abnormalities of the spine. REMOVING THE CAUSE of the disease and NATURE does the curing. HE REMOVES IT. The Chiropractor does not promise to CURE anything. He removes the obstruction to natural nerve supply and Nature does all the curing.

## WEEKLY PROVINCIAL NEWS BULLETIN

Issued by the Publicity Commissioner  
Government Buildings, Edmonton

Importance of cutting a portion of the rye crop throughout the province for hay purposes, is emphasized by officials of the agricultural department. The likelihood of a shortage of hay crop in the northern part of the province makes it an urgent matter that farmers who have rye crop put up some of this for hay. The rye should be cut at once for this purpose, and a ton to a ton and a half should be allowed for each head of stock on the farm.

A total of 30,000 acres of land has been listed with the officials of the irrigation council for sale through the government plan to bring in settlers for the lands of the Lethbridge Northern Irrigation project. These lands listed are all improved and are listed from \$12.50 to \$35.00 an acre. Dominion and Provincial officials are assisting in the colonization scheme for these lands.

Following a conference between Premier Greenfield, H. Stutchbury, mines commissioner, John T. Stirrup, chief director of mines, and Geo. Hart, government engineer, on the question of marketing Alberta coal, a further conference will be held this week with some of the coal operators of the province. The entire situation will be discussed thoroughly.

The new civil service superannuation act is now in effect. This provides a fund for superannuation of civil servants, the retiring age for men being 65 and for women being 55. Under this new scheme four per cent is deducted from the salaries of

relief to many sections although some localities still report dry conditions. Points along the main line of the P.-R. from Calgary eastward report good rains during the past few days, with conditions much improved. Grain previously had shown signs of burning in some sections, and in some cases late sown crops had shown poor germination. This stuff, however, will be much helped by late rains, although the yields will be only fair.

Central areas—Dry conditions reported in many sections of the central areas have been alleviated by the late rains. From Calgary to Red Deer localities where the grain had commenced to suffer drought, conditions are somewhat better. Olds district which has had drier conditions than usual, reports half an inch of rain in the past two days. Along the Goose Lake line and east of Red Deer and Banff to the boundary of the province, prospects are fairly satisfactory and an average crop is expected, although the recent rains have not been as heavy in these districts as in others. Hay crops will be light, owing to the very late start and dry conditions which have prevailed. Fall rye is also light in the central areas. No serious damage from hail is reported.

Northern areas—Rains in these areas, too, have improved the situations derably, although lack of moisture during the earlier growing season seriously retarded crops in some localities. Heavy rains have been fairly general over these districts in the past few days, and the indications are that grain yields will average fairly well. Wheat will be short in the straw, however. Hay crops are light, but continued moisture will make an average crop. Grasshoppers have not offered any serious menace in the northern districts. Farmers in northern areas are advised to put up all hay possible.

Hail—Several districts in the province report hail storms, which have done damage within a limited area. Generally speaking there has been no extensive damage from this cause.

Grasshoppers are under control, but still appearing in great numbers in land not yet cultivated.

South-eastern areas—Recent rains from Calgary and Lethbridge eastward and in the Medicine Hat district have been fairly heavy and have bro-

tal employees, to which is added four per cent by the government, creating a fund with added interest which will provide annuities to civil servants on retirement from the service. Allowance is made for length of service of employees with the government previous to the act coming into force. The act is administered by a board of which Hon. Alex. Ross is chairman, and F. Smalley, civil service commissioner, and D. Donaldson of the civil service organization are the other members.

The new tax recovery act passed at the last session is now in operation. Land owners in arrears of taxes after July 1st, will still have until August 14th to pay up, but if arrears remain unpaid after that date, the municipality in which the land lies files a caveat against the land, and within one year from the date of filing, if the taxes are still unpaid, the municipality may take title of the land. During the year, owners may pay arrears and the caveat may be withdrawn. After title is taken by the municipality, the owner may still redeem the land up to the time it is offered for sale by public auction. Provision is also made for giving the tax delinquent ample notice with warning during the month of March that their lands are in arrears and liable to forfeiture and if they are not redeemed within the redemption period they pass finally into the possession of the municipality, free from all encumbrances except claims for seed grain and relief items.

Hon. V. W. Smith, minister of railways and telephones, who also administers the irrigation act, has just completed a tour of the southern irrigation districts, and the construction work of the Lethbridge Northern project.

## BOND-SMITH

A very pretty and interesting wedding took place at the home of Mr. and Mrs. Dave Smith, near Groton, Alta., when their second daughter became the bride of Mr. Joseph Harold Bond, son of Mr. and Mrs. Geo. M. Bond, of Blairmore. The Rev. Fr. Hermes, of Lethbridge, officiated.

The bird was attired in a beautiful gown of Habutai silk and was attended by Miss Mildred Bond, sister of the groom, who wore old rose silk. Mr. James Campbell, principal of the Lucky Strike school, acted as best man. The presents to the couple were many and beautiful.

After the ceremony a dainty supper was served to those present and was followed by a reception and dance in the Coolee View school house, of which Mr. Bond has been principal for several months past. Mrs. Bond, mother of the groom, acted in the capacity of organist for the wedding and she was assisted by Mr. Campbell in providing music for the reception and dance.

Mr. and Mrs. Bond left on the Saturday afternoon train for Edmonton with the best wishes of all their friends.

**HOW FIRES START**  
One of the most frequent forms of involuntary incendiarism known is the way thoughtless individuals—generally smokers—throw away matches without taking the simple precaution of blowing them out, and asuring themselves that they are extinguished—a matter of a second or two, although they were perfectly willing to spend fifteen seconds in igniting the match and lighting the tobacco. This careless practice is universally prevalent throughout the country. Deputy Fire Marshall Lewis, Ontario.

Going hunting or fishing? Then you are interested in keeping the forests green. Put out your camp fire.

A forest of pines and firs which took 200 years to grow, may be destroyed in half as many minutes by a forest fire.

Forest fires destroy your inheritance—Help to prevent them.

## Peace River Farming

**Vegetables, Cereals, Small Fruits, Wild Flowers, Field Roots and Some Fodder Plants Yield Well.**

Canada has a valuable agricultural region in the Peace River district. Bulletin No. 6 of the Federal Department of Agriculture deals with experiments at the sub-station of the Dominion Experimental Farms located at Fort Vermilion, Alberta. The settlement at this place lies on the banks of the Peace River, 350 miles north of Edmonton, in fifty-eight degrees twenty-four north latitude, 116 degrees west longitude, and 590 feet above sea level.

Fort Vermilion has had the usual romantic career of a frontier post depicted in Sir William Butler's "Great West." First there was the fur trader, then the Indian mission, and next the pioneer and agricultural development. The Hudson's Bay Company has done some tilling prior to the establishment of the mission, which did not come about until 1880. Twenty-eight years later, or in 1908, the first Director of the Dominion Experimental Farms, Dr. William Saunders, entered into an arrangement with Robert Jones, an early settler, to carry on investigation work with cereals, fruits, and vegetables. Five acres of land were first rented and then added to until now twenty-five acres are occupied and conducted by Mr. Jones, from whose annual report the bulletin here referred to has been compiled. From these reports it would appear that potatoes, asparagus, beets, carrots, cabbages, turnips, parsnips, onions, turnips, and rhubarb can be turned certain crops, and crops that mature fairly early. The season is short but vigorous. Peas have done well every year since 1909, except in 1910, when an exceptionally heavy frost proved destructive. Beans do well in ordinary years, but corn, pumpkins, tomatoes and citrus may be regarded as uncertain, although fodder corn can generally be relied upon. Cucumbers have done well, but gherkins, plums and apples have not thriven to any considerable extent. The harder flowers flourish, and the garden at Fort Vermilion has attracted much attention.

Five varieties of wheat have been sown, average yield being 3 bushels per acre; Bishop, 13 bush; 40 lbs. Hines, 55 bush; 30 bush; Red Pipe, 55 bush; 25 lbs.; Marquis, 53 bush; 35 lbs.; and Prejudice, 41 bush; 50 bush. Oats in the same average have yielded: Danvers, 33 bush; 33 lbs.; Dauhney, 66 bush; 31 lbs.; and Eighty Day, 62 bush; 2 lbs. Barley similarly tested have produced: Manchurian, 60 bush; 40 lbs.; Champion, 56 bush; 15 lbs.; Success, 53 bush; 36 lbs.; and Halles White, 51 bush; 42 lbs. Various sorts of root foods have been experimented with successfully. Sunflowers for ensilage have proved promising, and surprisingly large crops of green fodder have been obtained from corn. Of clovers and grasses, Grimm and Ontario Variegated varieties of alfalfa, and red clover, have proved promising. Alfalfa has not been satisfactorily tested.

The harder flowers flourish,

and the garden at Fort Vermilion has attracted much attention.

### Hungry Children

**The Important Part that Food Plays in a Child's Life**

(By Lydia Lila Roberta)

A mother was looking over a box of old photographs and her little boy was an interested watcher by her side. As one picture came into view, the boy exclaimed, "Whenever I see a picture of Auntie Gertrude it makes me feel hungry." Afterwards he explained that it was because she brought him so many good things to eat.

The aunt referred to was a very busy woman, yet she always managed find time to slip a gingerbread man, or a popcorn ball, or a surprise package into her bag for the children where she visited. Another child never forgot a basket trimmed with colored tissue paper, holding home baked cookies that her aunt brought to her after she had been sick.

Food plays an important part in a child's life, and mothers teach him to appreciate it as other things. All children love surprises, and little faces brighten on stormy days when a raisin cake baked in their own little pan appears, or a lunch-box dinner is placed on the playroom table with salty sandwiches and fruit, and maybe a bit of candy or a few nuts.

Any little boy or girl likes to learn to cook when mother is cooking and though that is not an especially good time for mother in one way, yet in another way it is the best time, for children are happy when busy and learn quickly when interested. When mother makes bread, the little tot should have a half of dough and a raisin or a bit of jam to make a biscuit. If the child has dishes big enough—and this is important, for there should be a small man or unbreakable dish to do the cooking in—the work can be done exactly as mother does it and there come the first lessons in cooking.

"I can turn those doughnuts," suggested a small boy to his grandmother, who was making the toothsome goodies. She started to turn him away as she was busy and a bit nervous, but thought better of it and showed the child just how carefully it must be done. Consequently he turned every single one in a most graceful manner and informed the family promptly that night, "Grandma and I made doughnuts today."

The ten cent store has many a small enamel plate that would make a start towards a little girl's cooking set, and would give her much pleasure and profit if she learned to care for the pans and to cook simple things in them. The best way of all to suggest to a child that a biscuit be made is daddy's supper, or a tiny cake as a surprise for a playmate. Thus the lessons in cooking and giving, planning and usefulness are learned together.

### Prince Interrupts Battle

**Indian Tribes Declared Armistice Until Motor Had Passed**

Battles in old days have sometimes ended because the combatants were tired, or to allow them to prepare a meal, or because the weather was hot.

But never until the Prince of Wales' motor drove up the Malakand Pass, on the northwest frontier of India, has a battle been interrupted on both sides to go off to see the sights.

In this part of India, on the border of Afghanistan, there is usually some sort of tribal warfare going on. Just now the peoples of Swat and Dir are at enmity, and they were fighting when the Prince drove along. Both tribes were anxious to see him, so they arranged an armistice, and lined the road to get a good view.

Then, when he had passed, they were foolish enough to start fighting again.

### Can't Go Wrong On This

When you drive into a town in Maryland, a big map painted on a blackboard at the city limits shows you where the principal thoroughfares are and how to find the road you want to take out. When you approach a curve in a Connecticut motor road white posts indicate the turn so that you may not run off the road and at a convenient point a signboard map chart is for you the contour of that portion of the road ahead which you cannot see. Things like these pay dividends in satisfaction and safety for tourists. —Minneapolis News.

### Government Grading of Cream

Alberta claims to be the first province in the Dominion and probably the first in the world to adopt a system of government grading of cream. Under this new system, Alberta hopes to improve the quality of cream and hence the quality of butter production, and once again to win the crown of the premier butter province of the Dominion.

A new electric machine gun hurl a perfect rain of bullets at the rate of 26,000 a minute.

## TEN NEW STURDY CANADIANS

A family of ten leaving the homeland together to seek a home in a far country is an unusual event. Yet when the "Empress of Britain" left Liverpool towards the end of May, 1922, she had aboard amongst her third class passengers Mr. E. Hilton, aged 43 years, his wife Jane, aged 43 years, and eight children—three boys and five girls. The family are of the farming class, coming from Farworth, Lancashire. This entire family was given a free passage to Canada by the British Overseas Settlement Committee. The Hiltons went to do farm work guaranteed by the Ontario Government.

The Hiltons left two other members of their family behind in England and these will come to Canada at a later date.

### For Better Roads

**Saskatchewan Good Roads Association Is Formed**

At a meeting held in the office of Hon. S. J. Lash, Minister of Highways, in Regina, the Saskatchewan Good Roads Association was founded principally for the purpose of promoting the better roads movement which has taken a firm hold in other parts of the country. Major Grassick, of Regina, was elected President; Hon. C. M. Hamilton, Minister of Highways, was chosen Honorary President.

Other officers elected were: Vice-President, Sheriff L. G. Calder, Saskatchewan; Executive, L. A. Thornton, Dr. Henderson, J. F. Bryant, E. B. Hingley, Lieut.-Col. A. C. Garner, W. F. Hodges, all Regina; F. E. Raymond, Assinibina; F. E. Raymond, Saskatoon; Thomas Teare, Marquis; D. Laycock, Swift Current.

The objects of the association are set out in this document as:

(a) To create and develop public interest in good roads throughout the province of Saskatchewan.

(b) To promote wherever and whenever possible the location of a correlated system of highways.

(c) To promote the most scientific and economic methods of construction of the various types of roads suitable to traffic needs.

(d) To promote economic and effective means of maintenance of highway and the preservation of capital invested in highways.

(e) To correlate and consolidate highway sentiment in the province that ways and means for the development of highways may reach as nearly as possible the maximum of efficiency at the minimum of cost to the public.

### Find New Lakes

**Forestry Service Flyers Made a Number of New Discoveries in the Mountains**

Several hitherto unknown lakes and river valleys have been discovered in Jasper Park through the use of Government airplanes.

This was undertaken by the High River station, Alberta, and three experimental flights were carried out over the region for the purpose of exploration and reconnaissances. The Canadian Air Board's report states: "A flight was made on each of three successive days with gratifying success and the possibilities of the use of aircraft for exploration in mountain regions and in the administration and general maintenance of the park system were proved without doubt."

At the conclusion of the operation Col. Major M. Rogers, Park Superintendent, who was taken as observer on each of the three flights expressed himself as highly pleased with the results obtained and with the rapidity with which it was possible to reach any part of the park as compared with making a similar trip by trail. In the seven hours flying over the park he claimed to have travelled more distance and inspected more country than he could possibly have done by trail in six weeks' or two months' hard travelling. Col. Rogers also expressed the opinion that much work had been done to demonstrate the absolute necessity of having machines stationed at Jasper Park to continue this exploration and reconnaissance work, as well as for the purpose of forest fire protection.

Some 25 different tribes inhabit the Philippines, speaking 12 dialects.

### Repairing Buildings In Russian Capital

**After Six Years of Neglect, Moscow Showing Activity**

Moscow is beginning to show some building activity. After nearly six years of neglect, which practically stopped all private building and some public institutions were permitted to fall into disrepair, both the Soviet officials and private individuals are now in the throes of a repair campaign.

The hotel where most of the foreigners coming to Moscow are housed and which six months ago was a nightmare of dirt, vermin and lack of service, has just been renovated and is to be put back on a pre-revolution basis.

Guests long accustomed to carrying their own water, brewing their own tea and cooking their own food in their rooms, now are becoming accustomed again to the magic use of push button. Elevators are to run, lifts to be provided and the campaign against vermin is on in full swing.

To encourage repair of apartment buildings and detached dwellings, thousands of which have fallen into such a state of disrepair that they have been abandoned entirely, the Moscow Soviet has decided to utilize private enterprise. Persons or corporations who will take over and repair these structures, are given ten year rent free leases on them and may rent them to whom they please. They may even transfer their leases to other persons and in these houses no limit is placed upon the amount of space any one person may occupy.

### An Echo from the Past

**Agid Pole Claims to be Only Survivor Of Napoleon's Armies**

Sergt. Jan Krasinski, a Pole, who says he is the only survivor of Napoleon's armies, proposes to settle down quietly for the rest of his life in the district of Posen, where land is provided by the Polish Government for war veterans.

He says he fought in the battle of Borodino, 110 years ago. He was 22 years old at the time, he says, which is still full of life and vigor and looks like a sturdy octogenarian. He was adopted by the Russians at Borodino when he was 22.

Krasinski claims he was born the year after the French revolution began. He was two years old when Murdock introduced gas lighting to the world. He was a man long before the first railway was built, and before the first steamship crossed the seas. He completed his first half century before telegraph lines were established. He was a lad of 15 years old when Nelson won the battle of Trafalgar.

### Large Coal Output in Alberta

In spite of a strike and the coldness of the winter there was a larger production of coal in Alberta last winter than in the previous one. The total output for all kinds of coal from January 1st to March 31st, 1922, was 1,458,573 tons in the same period in 1921. For the month of March the coal mined in the province was 417,023 tons compared with 482,472 last year.

## French Police Use Radio

**Kept Track of Holiday Crowd With Airplanes and Autos Fitted With Wireless**

What deserves special emphasis is undoubtedly the actual use of wireless telephony and aeroplanes by the police for the maintenance of order on festival days and other occasions when demonstrations are possible. Nothing like enough attention has been given to this remarkable innovation. It is hard to see how there can ever be more room, mass movements stay and unexpected demonstrations in future. The authorities are too well armed.

There was, of course, little fear of serious street troubles in Paris on May Day this year. In spite of the efforts of labor agitators and Communist leaders, Paris workers only meant to spend an idle and rather boring twenty-four hours. But had conditions been altogether different, had passions run high, these aeroplanes hovering over the city would instantly have reported any menacing concentration and police forces would have been hurried to the spot.

The observers sat aloof ready to telephone instructions. They surveyed the city from the vantage point of the sky and directed the police as generals used to direct troops from a mountain top. It is doubtful whether the storming of the Basside would have been possible had aeroplanes equipped with wireless telephony been able in those days to signal the gathering of groups in different parts of the city.

Probably these precautions were superfluous this year, but they are none the less significant. The aeroplanes, communicated with the Prefecture of Police and the barracks of the Garde Municipale. On the streets were motor cars with wireless apparatus. The antennae stretched out ten feet above the ground. At regular intervals from each section of Paris reports arrived concerning the density of the crowds. Had it been necessary it would have been possible to have brought up reinforcements in a few minutes to any part of the city.

It will be realized that this is one of the most remarkable modern developments in police organization. Within a month of this year it is expected that every station in France will be provided with motor car patrols, each of which will be instantaneously signalled whenever anything happens which calls for vigilance. There have recently been many crimes against society—bandits operating in motor cars, for example—and some alarm has been felt at the growth of lawlessness and the comparative immunity of the criminals. Henceforth wireless telephony, and at need police aeroplanes, will make it easy immediately to spread a net about the lawbreakers.

### Saskatchewan Rural Schools

**Reports Show that Conditions Throughout the Province are Satisfactory**

A report by the chief administrative officer to the Saskatchewan Minister of Education for the month of April, dealing with the operation of rural and village schools and the attendance of pupils therein, indicates that both with respect to operation and attendance, conditions throughout the province are very satisfactory. The number of schools reporting all pupils in regular attendance in April, 1921, was 519, in April, 1922, 509. Illness and bad roads are given as the main reasons for irregular attendance. The number of motor car patrols, each of which will be instantaneously signalled whenever anything happens which calls for vigilance. There have recently been many crimes against society—bandits operating in motor cars, for example—and some alarm has been felt at the growth of lawlessness and the comparative immunity of the criminals. Henceforth wireless telephony, and at need police aeroplanes, will make it easy immediately to spread a net about the lawbreakers.

The department has every reason to feel satisfied with the efforts that are being made by school and municipal officials to keep the schools in operation.

### Separating Oil from Tar Sands

It is reported that the McMurray Asphaltum and Oil, Limited of Petrolia, Ontario, has been granted concessions by the Dominion Government and has perfected a process for separating oil from tar sands at Fort McMurray. It is said that \$250,000 will be expended on initial work in connection with same. Ninety thousand acres of tar sands are reported to have been leased by the company by the Federal Government.

### Believe in Advertising

The Nova Scotia Government has under consideration the expenditure of \$15,000 in advertising the province as a tourist resort, and also in making better known her natural resources and potential wealth to the investor and intending settler.

A sign has been discovered in an old tailor shop in Pompeii reading: "Creates beauty in your foggas while you wait."

Perfect in attendance—Aera Brown, Ruby Howe, Edith Hayes, James Lord, Aachen Palmer, George Passmore, Hugh Robbins, Kathleen Smith, Eve linea Duart, Bertha Piro, Alice Hornquest.

Rhoda McLean, teacher

Grade VII.

Enrolment 28, teaching day 22, aggregate days' attendance 593.5, av-

ality or initiation reject a derby as uncomfortable, unhygienic, unnecessary and preposterous? If he accepts a derby when the hat clerk offers it to him, it is because he is inclined to do the conventional thing, the usual thing, no matter how absurd, without enough force of character to assert his rights. I maintain that in a democratic country every honest, freeborn yeoman is entitled not to wear a derby hat.

An employer once remarked to me:

"Beware of hiring, for an important job, a man who wears a too conspicuously large lodge emblem. Either he has never amounted to much and being a member of a lodge is the only thing in which he can feel any pride, or else he expects to gain some advantage for himself from other members of the lodge."

The best lodge members are those who say little about it and treat it just as an incident in their lives, rather than as one big issue!" — Fred Kelly in *The Nation's Business*.

D. M. J. Colway, Principal

High School

Enrolment 22, teaching days 22, aggregate days' attendance 475, average attendance 21.59, percentage of attendance 98.69.

M. T. Davis, teacher

To BE KEPT APART

Sparks and gasoline.

Caps and dynamite.

Electric wires and metal objects.

Children and matches.

Electric bulbs and combs or hairpins.

Careless people and camp fires.

Gas jets and lace curtains.

Coal oil lamps and shaky tables.

Forest slash and cigarette stubs.

Brush piles and careless smokers.

Celluloid combs and hot hair curlers.

Lighted matches and forest underbrush.

Miss White was a visitor to Calgary and brought her sister to be a guest of Mrs. Dawson during the holiday season.

The Crows' Nest Pass Motors reports the sale of nearly forty motor cars this season. During the past week a carload of Chevrolets were disposed of. They are agents for the Chevrolet and Studebaker cars.

The Calgary Albertan is using the Radio to convey news from the Calgary fair grounds to the editorial department. It is stated that this is the first time in the history of Canadian newspapers that news has been carried in such a manner.

The Irish are still at it tooth and toe nail and it looks as if the World War is going to be a mere detail before they wind up their fireworks.

R. A. Johnson, a druggist of Hanna, took three bicloride of mercury tablets in mistake for aspirin, and according to today's paper, he is awaiting death. Three doctors are attending him.

The Lethbridge fair is being held this year on July 31st and August 1st and 2nd. They have arranged an attractive program and it will undoubtedly be the best fair in the history of the organization. The live-stock exhibits are expected to surpass all previous years and agricultural products will occupy a prominent position. Purse amounts to \$1,100 are being offered for seven races on each of the days of August 1st and 2nd. A very good program has also been lined up for the grandstand attraction. Reduced railway fares will be in force for those who wish to attend.

tend.

## Cowley Happenings

George Ritson was a recent visitor to Medicine Hat.

Miss Reta Coates, of Calgary, is spending a few days with her parents here.

Miss Nellie McWilliams is spending a few days at the home of her parents at Lethbridge.

Mr. Brown and Mr. and Mrs. Geo.

Sharp and daughter were week end guests in town.

Miss Bernice Anderson, teacher of the junior room here has gone to her home in Parkland.

H. D. McMillan and a party of friends from Calgary, are holidaying at Waterfront Lakes.

Quite a number of Cowleyites attended the sports at Pincher Creek on the first of July.

Misses Cora and Eva Fortier have returned home from Calgary where they have been attending the Sacred Heart Convent.

Miss Doris Elton who has been attending the agricultural college at Guelph, Ontario, for the past year, has returned home for her holidays.

Miss Murial Murphy has returned home for her holidays from Edmonton, where she has been attending the Strathcona collegiate for the past year.

Miss Rosamond Blackburn who has been teaching at Gads Hill school, has returned to Fishburn where she will spend the holidays with her parents.

Some damage to crops is reported owing to the dry weather. However, a very welcome rain fell on Tuesday which temporarily relieved the situation.

A large number of members of the Pincher Creek Oddfellows Lodge visited the Cowley Lodge on Tuesday night on the occasion of the semi-annual installation of officers.

Miss Harding spent the week end in town with friends.

Bert Williams, of Coleman, is relieving Mr. Elwin of his duties at the drug store for a week or so.

Lumber goes up as forests go down. Take time to extinguish your camp fire.

## WORLD HAPPENINGS BRIEFLY TOLD

King George has appointed the Prince of Wales a Knight of the Thistle.

Prince Yorimichi Higashifushimi, 55, second of one of the oldest princely families and admiral in the Japanese navy, died June 26 at Hayama.

The question of legality of the sale of liquor on United States shipping board vessels outside the thirteen-mile limit will be determined in an early ruling by Attorney-General Daugherty.

Since the assassination of Field Marshal Wilson and Dr. Walter Rathenau, both President Millerand and Premier Polacque have been closely guarded by detectives. Their homes also are surrounded by police.

Germany is suffering from a violent attack of sun fever. During the past four years 400 cases of espionage have been tried, and a prosecution which took place the other day was the 12th within twelve months.

The dignity of an Earl of the United Kingdom, with the hereditary title of the Earl of Ypres, has been conferred by King George upon Field Marshal Viscount French. The announcement was made in The Official Gazette.

Several thousand school children placed Canadian maple leaves and flowers upon the graves of Canadian soldiers at Shorncliffe Cemetery. The floral tributes included a massive wreath from the girl students of Talbot, Lord Roberts and Ryerson Schools of London, Ontario.

Sir James Craig, the Ulster Premier and the Ulster members of the London and Belfast Parliaments attended a memorial service for the late Field Marshal Wilson in Belfast Cathedral; Bishop Grierson officiated. The police took elaborate preparations for the safety of those attending.

The Dominion Government will pay the Canadian militia \$3,000 for the removal of a section of the bridge over Palas Creek, Vancouver, B.C., to permit of the movement of vessels. An item in the supplement estimates to provide for the payment of this amount to the C.P.R. has been passed.

L. Reid is training some of his carriage pigeons at Sault Ste. Marie, Ont., for use with the 10-passenger aeroplane which he is now flying over the forest in the Michipicoten area this summer for the Spanish River Pulp and Paper Company. Already six of them have made the flight from Sault Ste. Marie to the Soo, a distance of about 30 miles, in a little better than half an hour.

## Something Special for the Fair Motorist.

## Prohibit Gold Export For Another Year

War Measure to be Enforced Until July, 1923

A proclamation has been issued in an extra edition of the Canada Gazette, extending the prohibition of the export of gold coin, gold bullion and fine gold bars for another year. The proclamation is issued under an act passed three years ago, authorizing the continuance of the measures taken during the war to prohibit the export of gold. The present extension of the prohibition is kept in force until July 1, 1923, unless an earlier termination is made by proclamation.

## If You Have Neuralgia, Rub on "Nervilene"

Apply Nervilene to the sore spot. Notice the pain gradually subsides deeper and wider as Nervilene's soothing influence is carried deep into the sore tissue. How quickly the pain is eased! In a little while you have forgotten the pain and all has gone. For Neuralgia, Nervilene, Nervilene is a boon. Large 35c bottles. Sold everywhere.

Automobile News in B.C.

Great activity prevails in the preparation of automobile roads for the summer tourist traffic in B.C. A gang of three hundred men are now at work on the highway between Rossland and Cascade, which will connect the boundary with the Kootenay region and is expected to be completed this season.

In 1844 Liverpool, England, was a small fishing village surrounded by a high mud wall.

Many of the Japanese railways supply their passengers with free newspapers.

## THERE IS DANGER IN WATERY BLOOD

If Not Corrected Serious Results May Follow

In no trouble, is delay or neglect more dangerous than anaemia, a poverty of the blood. It is very common in young girls and in persons who are active, in fact, in which case it may be destroyed forever. HALL'S CATALRRH MEDICINE is the only safe and effective remedy.

But taken in time there is a magic medicine which increases the number of red blood corpuscles thus enabling the blood to carry the oxygen to the tissues of the body.

Dr. Williams' Pink Pills have had much success in the treatment of this stubborn trouble because of this wonderful product.

The correction of anaemic conditions by Dr. Williams' Pink Pills is certain, as anything can be, if taken in the correct doses.

Mary K. Goss, of Montreal, P.E.I., says:—"My blood was thin and watery and my system very much run down. I could not eat nor work or walk upstairs without resting. I was frightened greatly from headache, my appetite was poor and I also trembled with indigestion. I began taking Dr. Williams' Pink Pills in a short time the results showed they were just the medicine I needed."

Only used six boxes but am now feeling stronger every day. I have done so for several years. From personal experience I can strongly recommend Dr. Williams' Pink Pills.

These pills are sold by all druggists and will be sent in mail for 50 cents a box or six boxes for \$2.50 by the Dr. Williams' Medlefe Co., Brockville, Ont.

Never tell a man he is a fool, he'll not believe you and you will make an enemy of him.

No Need to Change Uncle John—Willie, if you could have your way who would you rather than anybody else?

## Discover Ancient Village Laying Out of Private Grounds Reveals Curious Relics

What is believed to be a prehistoric village with pottery 4,000 years old has just been discovered during the laying out of private grounds at Sidmouth, Devon.

Over 300 articles, the majority of the neolithic age, have been unearthed. They include flint weapons, adzes, boring tools, a scraper and other relics of the period.

Probably the most valuable find is a profile portrait of a woman on an inner flake of flint, the features being shaped by numerous small cuts, giving indisputable proof of secondary working. It is similar to other specimens found several years ago, when the late Dr. Alfred Russell Wallace described them as a distinct addition to our knowledge of primitive man.

Some of the articles, it is claimed, establish continuous occupation of the site for many centuries before Christ. The discoveries have been made by David Chambers, who has submitted several specimens to the British Museum, from which reports have been received, confirming the antiquity of the finds.

## Circle Tours Through the Canadian Pacific Rockies

### Delightful Trip Afforded for Tourists Over C.P.R.

By the most magnificent mountain and inland water trip in the world, passing through Banff, lovely Lake Louise, Field and Glacier, thence to the Arrow and Kootenay Lakes, whirling in and out past majestic mountain peaks—on to West Roseau and Nelson enroute.

This delightful trip can be made in the opposite direction if desired and at remarkably low cost.

Any Canadian Pacific ticket agent will gladly give full information and arrange details.

### Pay Drydock Debt

An appropriation of \$130,000 in the supplementary estimates to settle, on the basis of 50 cents on the dollar, claims of creditors of the Prince Rupert Drydock Company in connection with the construction of the steamships Scotsthorpe and Britisher, was passed in the House of Commons.

We have all heard of the man who was killed by kindness—but the proof is lacking.

Prince Charles of Belgium is midshipman on the battleship which carried the Prince of Wales to India.

Mrs. Frank Wilkie, of Syracuse, N.Y., formerly matron at the State Reformatory at Industry, N.Y., who says she is delighted with Tanlac since it restored her health after she suffered eight years.

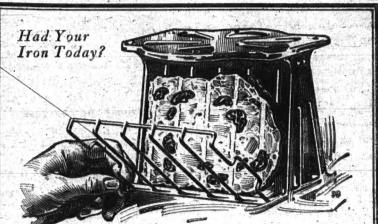

"This is the first time in eight years that I have been free from stomach trouble and it is all because of the wonderful good Tanlac has done me," said Mrs. Frank Wilkie, 229 Cedar St., Syracuse. Mrs. Wilkie formerly resided in Buffalo and for two years was matron of the State Reformatory at Industry, N.Y.

"I was eating scarcely enough to keep alive," she declared, "for I would rather not touch a bite than suffer the misery I knew would follow. Even sweet milk disagreed with me. I was sick in bed for two and three days at a time, and gas on my stomach made such awful pressure on my heart it almost cut off my breath. I had horrible dreams at night and in the morning was all tired."

"Well, the longest day I live I will be paid off," she added, "for if I would rather not touch a bite than suffer the misery I knew would follow. Even sweet milk disagreed with me. I was sick in bed for two and three days at a time, and gas on my stomach made such awful pressure on my heart it almost cut off my breath. I had horrible dreams at night and in the morning was all tired."

Tanlac is sold by all good druggists.

All men of genius are said to have clear, slow-moving, bright eyes. This is the eye which indicates mental ability of some kind.

## Had Your Iron Today? Toast It— Delicious Raisin Bread

Do this some morning and surprise the family. Serve hot raisin toast at breakfast, made from full-fruit. Luscious raisin bread. Let your husband try it with his coffee. Hear what he says.

Your grocer or bake shop can supply the proper bread. No need to bake at home.

Made with big, plump, tender, seeded Sun-Maid Raisins, and if you get the right kind, there's a generous supply of these delicious fruit-meats in it.

Toast on this full-fruited bread and you'll have luscious toast.

Rich in energizing nutrient and iron—great food for business men.

Make most attractive bread pudding with left-over slices. There's real economy in bread like this.

Try tomorrow morning. A real surprise. Telephone your dealer to send a loaf today.

## Sun-Maid Seeded Raisins

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.
